

Y69K™

QUARRY, CONSTRUCTION,
SURFACE & UNDERGROUND MINING

BATTLE ARMOR

- *L-5S Loaders, Underground Vehicles, Dozers*

 YOKOHAMA®

Y69K™

QUARRY, CONSTRUCTION,
SURFACE & UNDERGROUND MINING

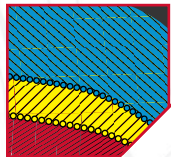

ENGINEERED FOR THE TOUGHEST JOBS

Whether you're clearing the pit or hauling ore from underground, the Y69K™ is constructed from the inside out to handle punishing terrain and the severe strain heavy equipment can inflict.

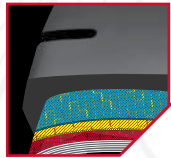

Modified Sidewall

Thicker upper sidewall with a more square shoulder profile protects the casing from damage caused by the rigors of severe service.

Steel Breaker Construction

Certain sizes incorporate special rubber-coated layers of steel cord between the casing and the tread to absorb shocks and prevent cuts from penetrating the casing.

Extra Deep Reinforced Tread

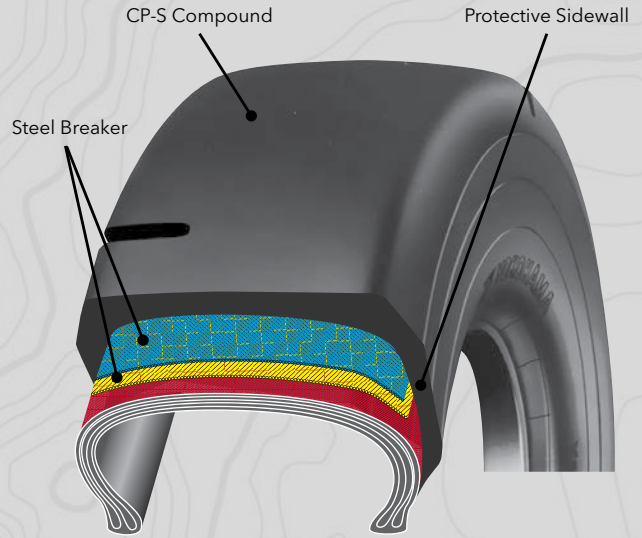

Provides longer tread life and enhanced durability even in the most extreme conditions.

Specially Formulated Tread Compound

The special CP-S compound of the Y69K is cut and chip resistant to extend service life.

DURABILITY. CONFIDENCE. SAFETY.
